Summary

Motivated B.Tech Computer Science student skilled in HTML, CSS, JavaScript, C++, and Java with strong knowledge of DSA and OOP concepts. Experienced in frontend development, technical projects, and collaborative problem-solving. Passionate about software development and continuous learning.

Education

PW Institute of Innovation

B.Tech in Computer Science

- CGPA: 8.15 (1st Semester)

Lucknow, India

2025 – Present

Experience

Frontend Development Intern

December 2025 – March 2026

Techdock Labs, Lucknow, India

- Explored emerging technologies and innovative approaches to improve development workflow efficiency
- Developed hands-on expertise in **HTML, CSS, and JavaScript**, strengthening frontend development skills
- Utilized debugging and analytical techniques to diagnose technical issues and optimize performance

Frontend Developer Intern

May 2026 – Present

PW LeapX

India

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, Tailwind CSS, and Bootstrap.
- Built frontend projects including a Gym Website and an E-commerce Website from design specifications.
- Implemented responsive layouts, reusable UI components, and interactive user interfaces across desktop and mobile devices.
- Collaborated with mentors and team members to debug issues and deliver production-quality frontend features.

Projects

PW Institute of Innovation Website | *HTML, CSS, JavaScript* | GitHub

- Developed a responsive 7+ page web application for institute events and student engagement
- Implemented form validation and interactive UI components to improve user experience

Technical Skills

Languages: C, C++, Java, JavaScript, SQL **Web Technologies:** HTML, CSS **Core Concepts:** Data Structures, OOP, Problem Solving **Tools:** Git, GitHub, VS Code **Soft Skills:** Team Collaboration, Adaptability, Time Management

Achievements

Core Member – Tech Club

PW Institute of Innovation

- Contributed to organizing technical events, coding activities, and collaborative learning sessions
- Supported workshops and promoted participation in development-focused initiatives

RIFT Hackathon – Money Muling Detection System

Team Project

- Engineered a prototype to detect suspicious money muling activities using transaction pattern analysis
- Designed rule-based logic to identify high-risk financial behaviors and anomalies
- Collaborated in a team environment to develop and present a working solution within hackathon deadlines
